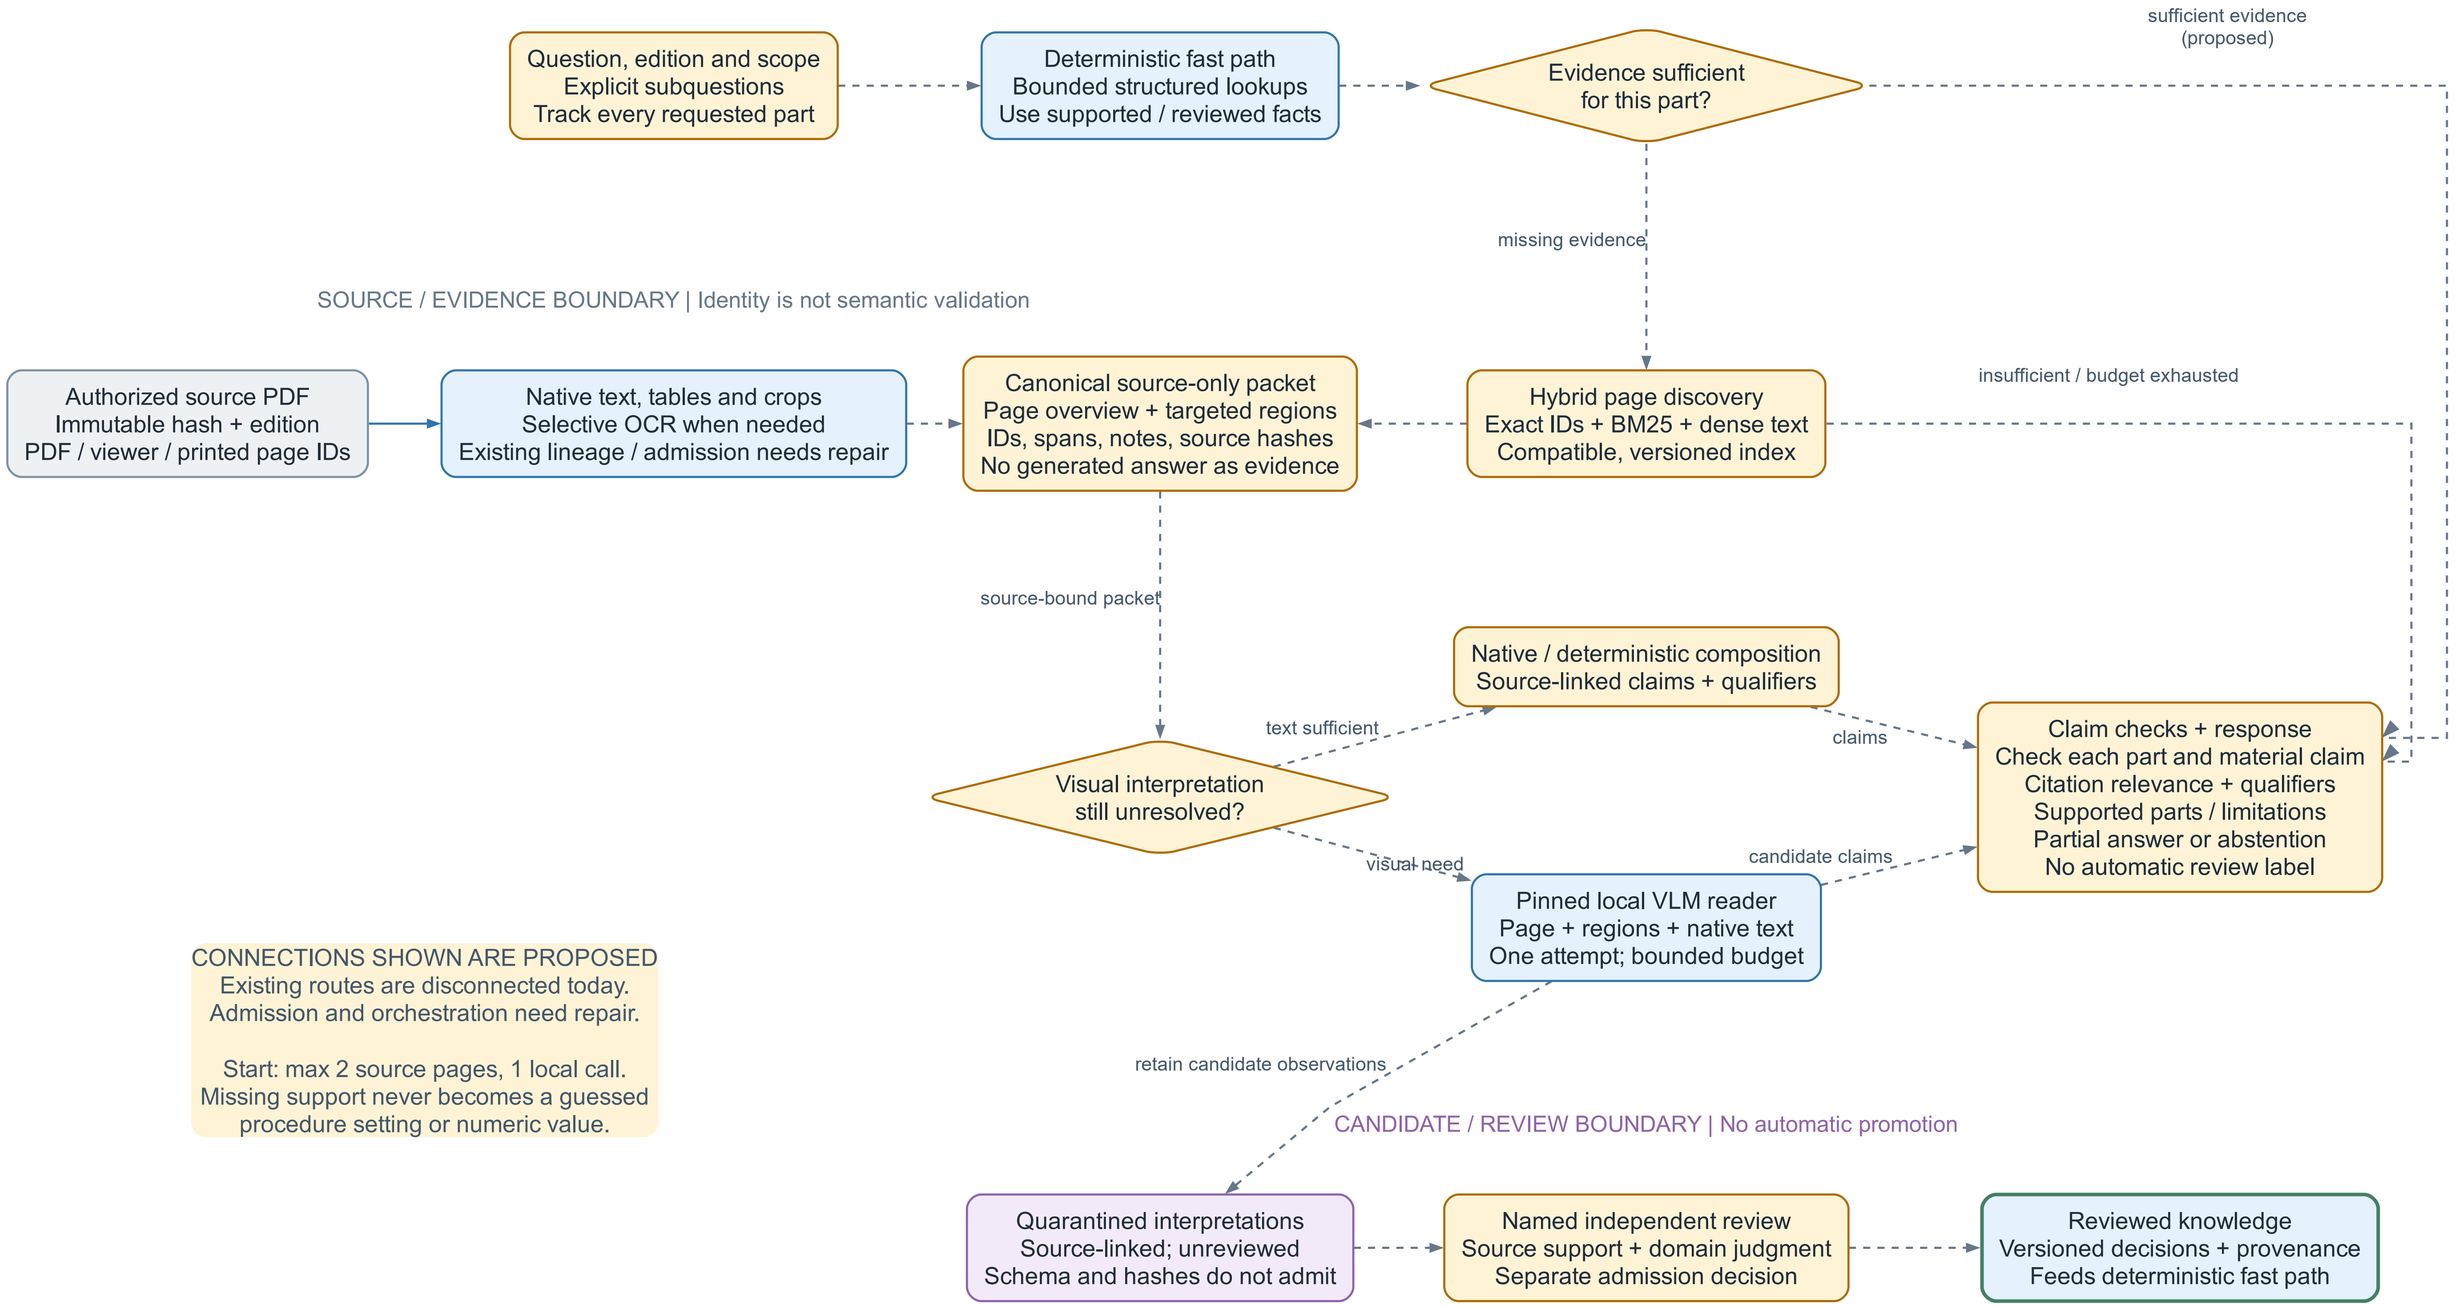
AWS A3.0 | Recommended future architecture
Evidence-first core + hybrid page discovery + conditional visual reading



CONNECTIONS SHOWN ARE PROPOSED
Existing routes are disconnected today.
Admission and orchestration need repair.

Start: max 2 source pages, 1 local call.
Missing support never becomes a guessed procedure setting or numeric value.

BLUE: existing reusable component	AMBER: proposed integration / repair	GRAY: immutable evidence
PURPLE: candidate authority	GREEN outline: reviewed authority only; not all existing records qualify	

All dashed connections are PROPOSED. Solid blue connection is existing native extraction.

RECOMMENDATION ONLY | Gate 6.7 reader unqualified; human review pending | 5 November 2026

ColPali / ColQwen deferred until reviewed page-selection misses justify a separate experiment.
